

Drive New Revenue Streams and Reduce Operating Costs with Smarter Home Care

See how home care can **lower readmissions** and **reduce cost of care** while **improving health outcomes** and **patient satisfaction**

CareLinx® partners with health systems, skilled nursing facilities, and other organizations to provide in-home, non-medical care services to patients across the country. Our innovative approach combines our unique marketplace model with our best-in-class tech platform to:

- **Remove the operational burdens** of creating, expanding, and/or managing private duty home care
- **Generate new revenue streams** with our revenue share models
- **Deliver better patient care** with higher caregiver wages at lower costs than traditional agencies
- **Assist patients and families** with critical activities of daily living such as bathing, grooming, transportation, and more
- **Gain visibility and control** over patient recovery via our HIPAA-compliant and HITRUST-certified tech platform
- **Reduce emergency department utilization** and unnecessary readmissions
- **Identify and act** on early intervention opportunities
